

Stefan Mandovski

Senior QA Automation Engineer / SDET

Bitola, North Macedonia stefan.mandovski@gmail.com +389 70 395 334 linkedin.com/in/mandovski

Detail-oriented QA engineer with 10+ years in manual and automation testing — black-box and white-box testing, test case design, and system integration testing — across e-commerce, energy, transport, and education platforms. Playwright and TestCafe day to day, Gatling for performance, deep API/backend validation experience, and a growing focus on AI-assisted testing and prompt engineering. Has led teams of up to 20.

EXPERIENCE

Sr. QA Consultant — School Management Platform

Oct 2025 — Present

Client: Education Sector

TestCafe

Playwright

Gatling

Azure SQL

Azure DevOps

PowerShell

- QA automation on a UK-based school management platform — TestCafe as the primary framework, Playwright for select suites, applying DRY/SOLID/Clean Code as coverage grows.
- Initiated a Gatling (Scala) performance-testing effort against core API endpoints, defining SMART goals and baseline load scenarios.
- SQL-based data validation via SSMS and Azure SQL, and working within Azure DevOps for work item tracking, test planning, and pipeline visibility.
- Ran internal demos of AI-assisted testing tooling for the wider QA team (see Shift Board under Personal Projects).

- + Established a Gatling-based performance-testing capability from scratch for the platform's core APIs.
- + Introduced AI-assisted testing practices to the team through hands-on internal demos.
- + Built and shared Shift Board, a personal AI-assisted QA workflow tool, as a public engineering initiative.

Sr. QA Consultant — Electricity Auction Platform

2024 — 2025

Client: Energy Sector · Team: 4 QAs (Lead)

Playwright

Robot Framework

Jenkins

Git

JIRA

TestRail

Postman

- Led QA efforts for a national auctioning platform for electricity bidding.
- Designed and maintained test plans, smoke/regression suites, and automated pipelines.
- Built a Robot Framework automation solution, later migrated to Playwright to meet performance and maintainability goals.
- Integrated the suites with Jenkins and implemented custom reporting for test health; later set up GitLab CI (runners, container registry, GitLab Pages hosted reports) for the Playwright suites.
- Served as QA lead in all Scrum ceremonies, handling sprint planning, reviews, and retrospectives.
- Managed resource allocation, daily task tracking, and ensured timely delivery.

- + Reduced post-deployment validation time by 70% through CI-integrated automation.
- + Successfully led test migration to Playwright within estimated delivery time.

QA Lead — E-Commerce Platform (US Pet Retailer)

2018 — 2023

Retail / E-Commerce · Offshore team of 20 QAs (Lead)

Selenium

Appium

Postman

SQL Server

Docker

JIRA

TestRail

Jenkins

- Oversaw end-to-end testing of a high-traffic e-commerce site and mobile app.
 - Performed end-to-end testing of the order lifecycle: from cart and checkout (WCS) to fulfillment, shipping, and returns (OMS).
 - Automated front-end flows in WCS using Selenium w/ Java and validated backend OMS workflows through API testing (RestAssured w/ Java).
 - Designed a test automation framework covering ~800 tests (UI and API), optimized via parallel execution — cut regression from 32 hours to 3.
 - Led mobile app testing using Appium (Java) with execution on SauceLabs.
 - Supported performance testing using JMeter, running baseline load tests on APIs ahead of holiday season.
 - Owned QA support during production deployments to ensure stable releases.
- + Validated full WCS-to-OMS integration for order placement, fulfillment, cancellations, returns, and PSP migrations.
 - + Reduced manual regression workload by 80% via automation.
 - + Delivered automation coverage for critical workflows while mentoring a fast-scaling team of 20 engineers.

QA Engineer — NS NL (Transport & Logistics)

2017 — 2018

Transportation · Solo initially, later mentoring 3 onsite QAs

Robot Framework

SOATest

Jenkins

dBeaver

JIRA

TortoiseGIT

- First QA on project; built a unified automation framework using Robot Framework.
- Integrated API, UI, and DB validations into a single framework for end-to-end coverage.
- Developed API test cases using SOATest, later migrated to Python/Robot.
- Mentored and trained 3 onsite QAs on test design, automation, and framework usage.

- + Framework adopted as the foundation of the client's automated testing effort.
- + Reduced test cycle setup time and improved knowledge transfer across QA teams.

SKILLS & TOOLS

Automation & frameworks: Playwright, TestCafe, Selenium (Java), Appium (Java), Robot Framework (Python)

Performance & API: Gatling (Scala), JMeter, Postman, SOATest, XRAY, TestRail

Data & platforms: SQL Server, Azure SQL, Oracle, Docker, Windows / Web / Mobile

CI/CD & DevOps: Jenkins, GitLab CI, Azure DevOps, Git

Programming & scripting: JavaScript, Java, Python, SQL, XML/XSD, HTML/CSS, XPath/CSS selectors, PowerShell

AI-assisted QA: Claude Code, MCP tooling, prompt engineering

Soft skills: Team leadership, mentoring, agile collaboration, analytical thinking, process improvement, communication, adaptability

PERSONAL PROJECTS

Shift Board — AI-Assisted QA Workflow Tool

Personal project · 2026 — Ongoing

- Built a Node.js application that wraps AI coding agents — Claude Code, and now also OpenAI, Z.ai, and Kimi — with MCP tracker integrations (Azure DevOps, Jira, GitHub, GitLab, Linear) into a QA workflow board.
- Enables QA engineers to generate test plan CSVs from tracker work items, maintain a per-domain business-rules knowledge base, and file bugs directly from natural-language descriptions.
- Deployed against live tracker projects; shared publicly with the QA automation community on LinkedIn.

EDUCATION

Bachelor of Information Systems — Institute of Informatics, Skopje

CERTIFICATIONS

Anthropic Academy — Claude Courses (10+ completed), 2025 – 2026

Gatling Fundamentals for Stress Testing APIs w/ Scala, Udemy — 2026

GenAI Tools & AI Agents for Software Testing, Udemy — 2025

API Performance Testing with K6 and GitHub Copilot, Udemy — 2025

ChatGPT Prompt Engineering Course, Udemy — 2024

Playwright JS/TS Automation Testing, Udemy — 2023

Cypress — Modern Automation Testing Framework — 2023

LANGUAGES

English — Excellent (speaking and writing)

Macedonian — Native
